Prelude

Background

Data Collection

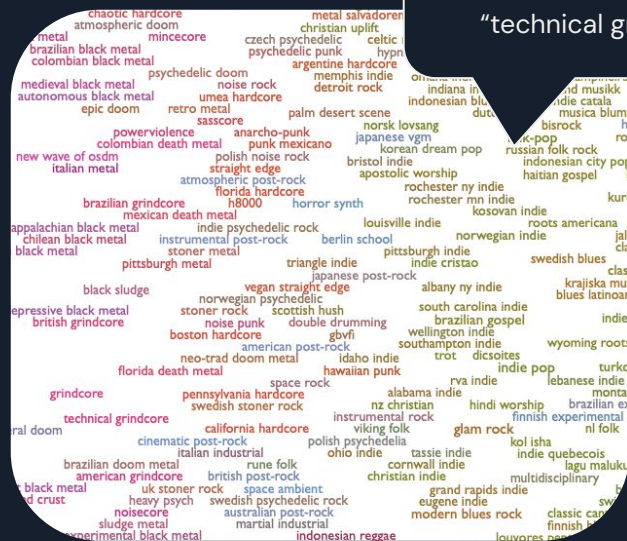

Modeling

Next Steps

Data Collection

The Sound of...	Song Count	Distribution
Pop	515	25%
Rock	630	31%
Hip Hop	385	19%
Country	494	24%

"vegan straight edge"

"medieval black metal"

"technical grindcore"

Modeling

Vectorization

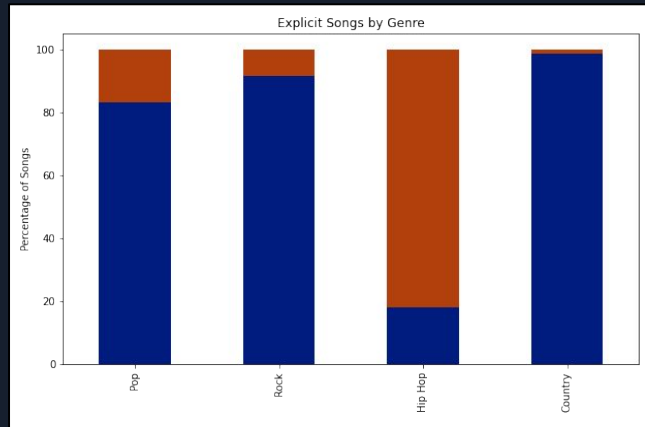

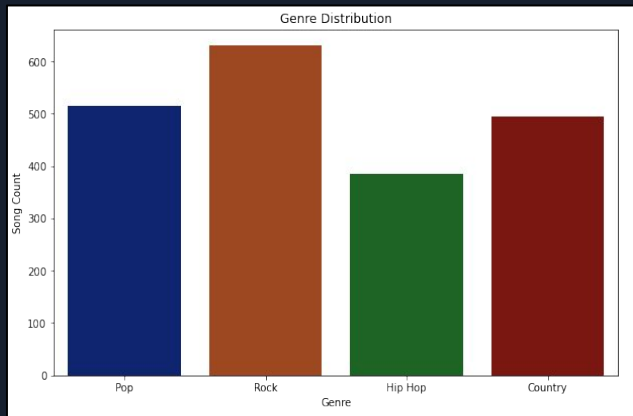

- Count
- TF-IDF

Sampling

- SMOTE
- Random

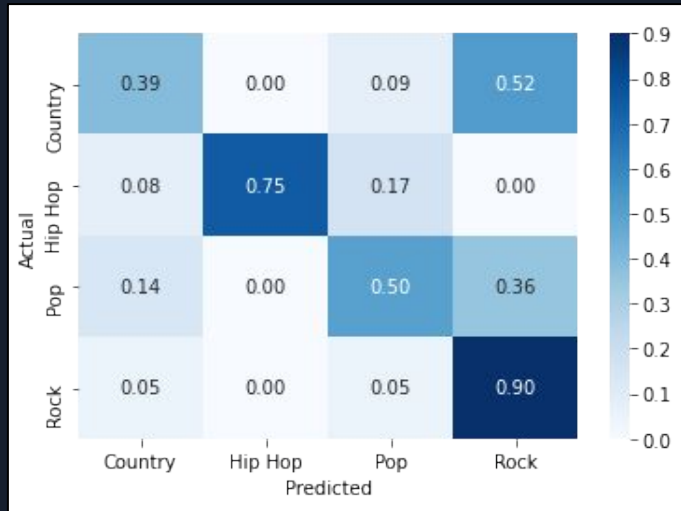

Classification

- Random Forest
- Multinomial Naive Bayes

Outro

1. Collect a larger variety of lyrics to address sample size issues
2. Limit time frame to consider the evolution of language
3. Combine audio features to focus on song structure
4. Analyze performance on songs from top charts
